

SECURE COLLABORATION PLATFORM

Client: US and UK Security Holding

Tech Group: AWS, Azure, Terraform,
Kubernetes, Docker, Python y JavaScript

They needed: One DevOps and one Python developer to build their secure collaboration platform.

We provided the client with highly skilled DevOPs and Python Developers following its requirements.

- 2 years working together
- Both developers among the most performing ones in the team
- Excellent communication and time management
- Financial transparency
