

VIKING SERVICES

Client: Payment Processing Specialist from Minnesota

What they needed:

To develop the frontend of their administration dashboard for businesses and payments.

The solution:

We formed a team of 4 developers and chose Angular as the core technology to carry out the project. We developed the frontend with the constraints imposed by the client's backend and successfully completed the work on time with outstanding quality.

Tecnologías: Angular, TypeScript, HTML 5, CSS3 y Bootstrap

- Frontend development tailored to the available backend.
- Project completed on time with high quality.
- Continuation of the business relationship for phases 2 and 3 of the project.
